TRANSFORMING POWER INTO PERFORMANCE

ABOUT US

MEGAVOLT POWER LLP, established in 2019 and start new plant in 2023 at Chhatral, Gandhinagar near Ahmedabad Gujarat & providing top quality transformer with our effective service to gain our customer satisfaction.

We continuously and sincerely put our efforts to enhance our technical knowledge through excellent industrial interaction which has developed a unique dimension to our product.

We deliver our transformer and other power equipment with our best quality product and after sales service support to our various customer which included leaders in steel furnace sector, solar sector, government and semi-government projects, refineries, fertilizer plants, power sector, pharma, Textile plant, cement sectors etc. & various other industries and state electricity boards in India as well as abroad also.

OUR TEAM

Our company has a team of young, energetic engineers and technicians with good technical knowledge. Our team also give training to customer team for awareness for periodic maintenance for healthiness of electrical equipment and plant.

OUR MISSION

MEGAVOLT POWER LLP intends to become a leading transformer and other power equipment manufacturing company at National and International market with focusing on high quality standard product, Human friendly, highly safe and cost effective solution with Best customer support and service.

OUR VISION

Our vision is be a BRAND, where the name is enough for buyer to choose. We measure our success by customer satisfaction. We satisfied customer with extraordinary team work by providing our best product. We approach our service with trust and hard work.

OUR GOAL

We want to be global leader, delivering enterprise for service, maintenance, consultancy & project management & solution.

We want to make global electrical consultancy by providing service to customer with best quality of technology, 24X7 support and technical management.

CONVERTER DUTY TRANSFORMER

(INDUCTION FURNACE/K-FACTOR TRANSFORMER)

- Range: Up to 15 MVA
- Voltage Class: Up to 33 KV Class
- Application: Suitable for 6 Pulse / 12 Pulse / 18 Pulse / 24 Pulse / 36 Pulse converters for AC & DC loads
- Construction: Single/Double/Trippl Deck additional phase shift windings for pulse higher than 24 Extended delta on Promary/Secondary side to achive desired phase shift
- Cooling: ONAN/OFWF/ONAF

INVERTER DUTY TRANSFORMER

- Range: Up to 15 MVA
- Voltage Class: Up to 33 KV Class
- Type: Multi Winding – 2 CCA in one tank – 4 Secondary
- Voltage Class: Up to 33 KV Class
- Application: Solar Power Plant
- Cooling: ONAF/ONAN

DISTRIBUTION TRANSFORMER & POWER TRANSFORMER

- Low loss distribution transformer with OLTC up to 5 MVA 11KV/0.433KV Class
- BIS Apporved Distribution transformer up to 2.5 MVA, 11KV/22KV/33KV Class
- Medium power transformer up to 15 MVA, 66 KV Class
- Application: Various manufacturing industries, power sector & Government projects
- Cooling: ONAN/ONAF

COMPACT SUB-STATION (CSS) / PACKAGE SUB-STATION (PSS)

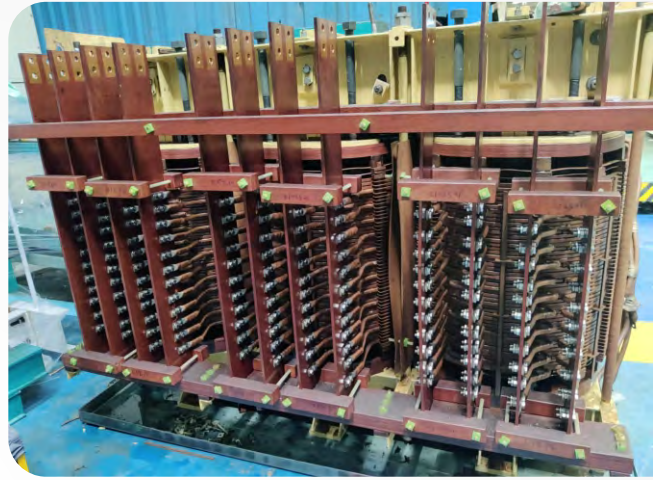

- Range: 3150 KVA, 33KV Class
- Voltage Class: 11KV/22KV/33KV Class
- Type: Including HT Breaker, Transformer with Off load or On load, LT Panel and APFC Panel – Custmized design as per customer requirement
- Application: Various residencial/ commercial sector and Industrial sector with Higly safety features
- Cooling: ONAN

LEAD REFINING FURNACE

(LRF) TRANSFORMER / BOOSTER TRANSFORMER

- Range: Up to 10 MVA
- Voltage Class: Up to 33 KV Class
- Type: Suitable for 6 Pulse / 12 Pulse with or without inter phase transformer, Tapping can be provided either in Main Transformer through regulation transformer
- Cooling: OFWF/ONAF/ONAN

POWER FACTOR CORRECTION SYSTEM

- Automatic Power Factor control Panel
- HT Power factor system with RVT, Capacitor and Reactor (Oil cooled or Dry type)

RTCC PANEL, MARSHALLING BOX & OTHER LT PANEL

- ◆ Mfg. of Panel with Customized design as per customer requirement

SPARES FOR POWER EQUIPMENT

- ◆ All types of transformer accessories like HV bushing, LV bushing, valves, gaskets, silica gel breather, OTI, WTI, Buchholz relay, PRV, Transformer oil, Heat Exchanger, Flow meter, Oil pump etc.
- ◆ HT Terminal Kit, HT tap, Earthing material, Panel material, OLTC material etc.

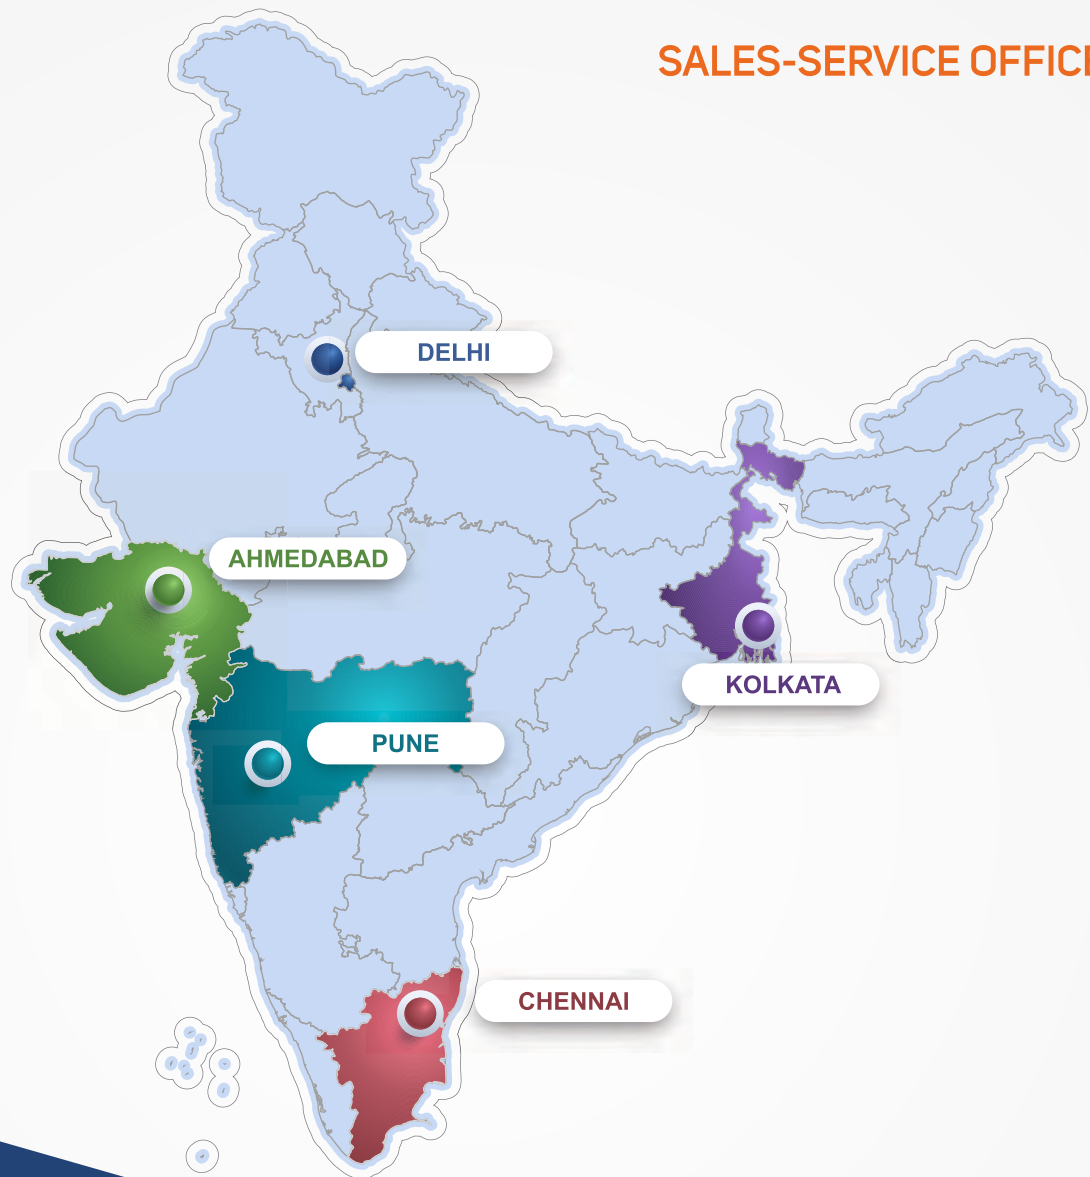

SERVICE PROVIDER

- Erection, Testing and commissioning of transformer and Compact sub station (CSS/PSS) up to 100 MVA, 132 KV class
- Testing at site before commissioning - up to 100 MVA, 132 KV class
- Overhauling of old transformer – Up to 100 MVA, 132 KV class
- Attending leakages of oil from Transformer & CSS.
- Oil filling and filtration of transformer
- Painting of transformer and CSS at site
- Annual Rate Contract for testing & maintenance of Transformer & Compact sub station
- Repairing & Rewinding of Transformer at site/work shop.
- Maintenance of O.L.T.C. of transformer at site.
- Provide transformer on rent to run the plant
- Transformer heat exchanger cleaning, maintenance and operation check of OFWF type job.
- Erection, Testing and commissioning of H.T Panel and L.T. Panel
- H.T and L.T cable lugging and termination with terminal kit.
- Erection, Testing & Commissioning of Sub-Station Equipment. Complete Maintenance of Sub-Station Equipment. Complete Painting of Sub-Station Equipment. Annual Rate Contract for Operating & Maintenance of Sub-Station.

SALES-SERVICE OFFICE

CONTACT WITH US

We want to be Global Leader, Delivering Enterprise for Service, Maintenance, Consultancy & Project Management & Solution.
